

C. Statement of Substance of Interview

Initially, Applicants thank Examiner Fubara for the kind courtesy of the telephonic interview conducted on October 15, 2009, to discuss the present application.

Applicants generally concur with the Examiner's summary of the interview as presented in the Interview Summary mailed on October 20, 2009. However, Applicants note that "football" referenced in the Interview Summary should read as --Foodball-- instead. In addition, it is respectfully submitted that as stated during the interview, Winskill does *not* study the *stereotypic* behavior in horses, rather it looks at the foraging habit in horses and effect of Foodball on this habit. In fact, Winskill does not disclose administering a composition to an animal exhibiting stereotypy. See Winskill, page 34, lines 4, 5, 10, and 11.

It is believed that this response, in conjunction with the Interview Summary issued by the Examiner, represents a complete written statement as to the substance of the interview, in accordance with M.P.E.P. § 713.04.
